Architect:

RALA Associates Architects/Engineers

Robert Lenehan at rlenahan@optonline.net or 845-639-7492

This iconic structure, completed in 1916 is also known as Paul Robeson Residence. This structure is not only a New York City Landmark, but it became a National Historic Landmark building in 1976 and it is located at 555 Edgecombe Avenue, at the corner of West 160th Street in the Washington Heights neighborhood in Manhattan NYC. Microcotta was selected to replace 7th, 10th and 12th floor balconies of various types as well as several large decorative brackets at the building cornice. When the project is completed there will be more than 300 Microcotta pieces on the building. Our product was used on both primary facades, the North and East elevations of the building.
